ITEMS FOR PLANNING COMMISSION REVIEW

- **Preliminary Plat.** Preliminary Plat Items to Consider:
 - *Legal Description:* This has been supplied
 - *Subdivision Name:* The Subdivision name appears on the plat and is consistent with the application that has been submitted.
 - *Lot Sizes and Orientation:* Complete.
 - *Parcel Numbers or Lot Numbers of Surrounding Properties:* When recording the plat, it is necessary to indicate the parcel identification numbers or the lot number for adjoining subdivisions. This plat includes this information.
 - *Right-of-Way (ROW) Dedication:* The ROW has been indicated on the drawings.
 - *Utility Easements:* The General Utility Easement required for property has been indicated on the plat.
 - *Signature Boxes:* Signature Boxes will be required for the Final Plat.
 - **Improvement Plans:** Developer has submitted improvement plans to be included in the submission.
-

-
- **Development Agreement:** A portion of this project involves property that is currently in the possession of South Weber City. In order to secure the future connection of Lester Drive to 7375 S the City is willing to give our land to the Developer on the condition that this connection takes place.

The proposed project includes several important points that must be considered. One of the key points is the timing of the project. According to the agreement, the property will become the developer's once all the improvements are completed. This ensures that the developer will not take possession of the property until all the necessary infrastructure is in place.

The agreement also outlines the sequence of events that must take place once the subdivision, development agreement, rezone, and improvement plans have been approved. This includes a pre-construction meeting, the removal of DeLong's home, the construction of all underground infrastructure, the completion of surface improvements such as asphalt, curb, and gutter, the closing of the north section of 1025 E private road, and the establishment of escrow for the remaining public improvements. Once these steps have been completed, the deed and the plat will be recorded together, with the deed being recorded first. Building permits can then be issued upon the recording of the plat, and the remaining public improvements can be completed. Certificates of occupancy will be issued once the project is fully completed.

Another important aspect of the Development Agreement is the rezone. The agreement includes the rezone as part of the development agreement, ensuring that the project is in compliance with the city's zoning regulations. The project will also connect to existing pavement on 7375 S, and the development agreement will be valid for a term of five years.

Lastly, the agreement includes a reverter clause, which ensures that the property will revert to the city in the event that the developer fails to comply with the terms of the agreement. It is also important to note that the agreement does not supersede Title 10 and Title 11 of the city code, which are the local zoning and development regulations. Overall, the Development Agreement for this proposed project includes several important points that must be considered and implemented by the City Planner to ensure that the project is successful.

STAFF REVIEW SUMMARY

City Staff has done a review of and have reviewed the following items:

Planning Review:

PL-1: **ZONING**

The primary current zoning for this project is Agriculture (A) a small portion of the project is currently zone Residential Moderate (R-M). The developer has requested a rezone for R-M which is consistent with the General Plan.

PL-2: PROJECT SIZE

The Project's approximately 5.461.

PL-3: LOT AREAS

Minimum lot area for R-M is 9000 sq ft. All lots are consistent with this requirement.

PL-4: LOT WIDTH

Minimum widths for R-M is maximum width of 80 feet for 25% of lots and minimum width of 100 feet for 25% of the lots with the average of all lots being more than 90 feet. The lots comply with this requirement.

PL-5: SETBACKS

Development will be able to accommodate all setback requirements with building permits.

PL-6: ACCESS

This development has impacts to cross access agreements found on private property. The inclusion of the road stub to the parcels on the south will accommodate access issues off of the Lester Drive extension.

PL-7: ROADS

Developer will be connecting Lester Drive to 7375 South. This will create a second egress opening up development opportunity in this area. Developer must complete this connection prior to any building permits being issued.
